Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Aston Clinton and Tring but makes limited contribution to appreciation of the gap. This is raised land, but there are limited views from the Holloway, and the A41 is a key separating feature. The essential gap is considered to be land to the west of the A41.

Purpose D **None:** No notable contribution

National Landscape
(NL)

Constrained: Within the NL

| | |

Site OGB6-2

Site Details

| | |
|------------|---------------|
| Reference | OGB6-2 |
| Settlement | N/a |
| Conclusion | Not grey belt |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **Strong:** Limited onsite built form (mainly agricultural) and not enclosed by existing development. There is containment by a lane, woodland and historic field boundaries, but containment to the east is somewhat weak. In conclusion, judged strong given limited built form or urbanising influences, challenging containment and because development would be incongruous.

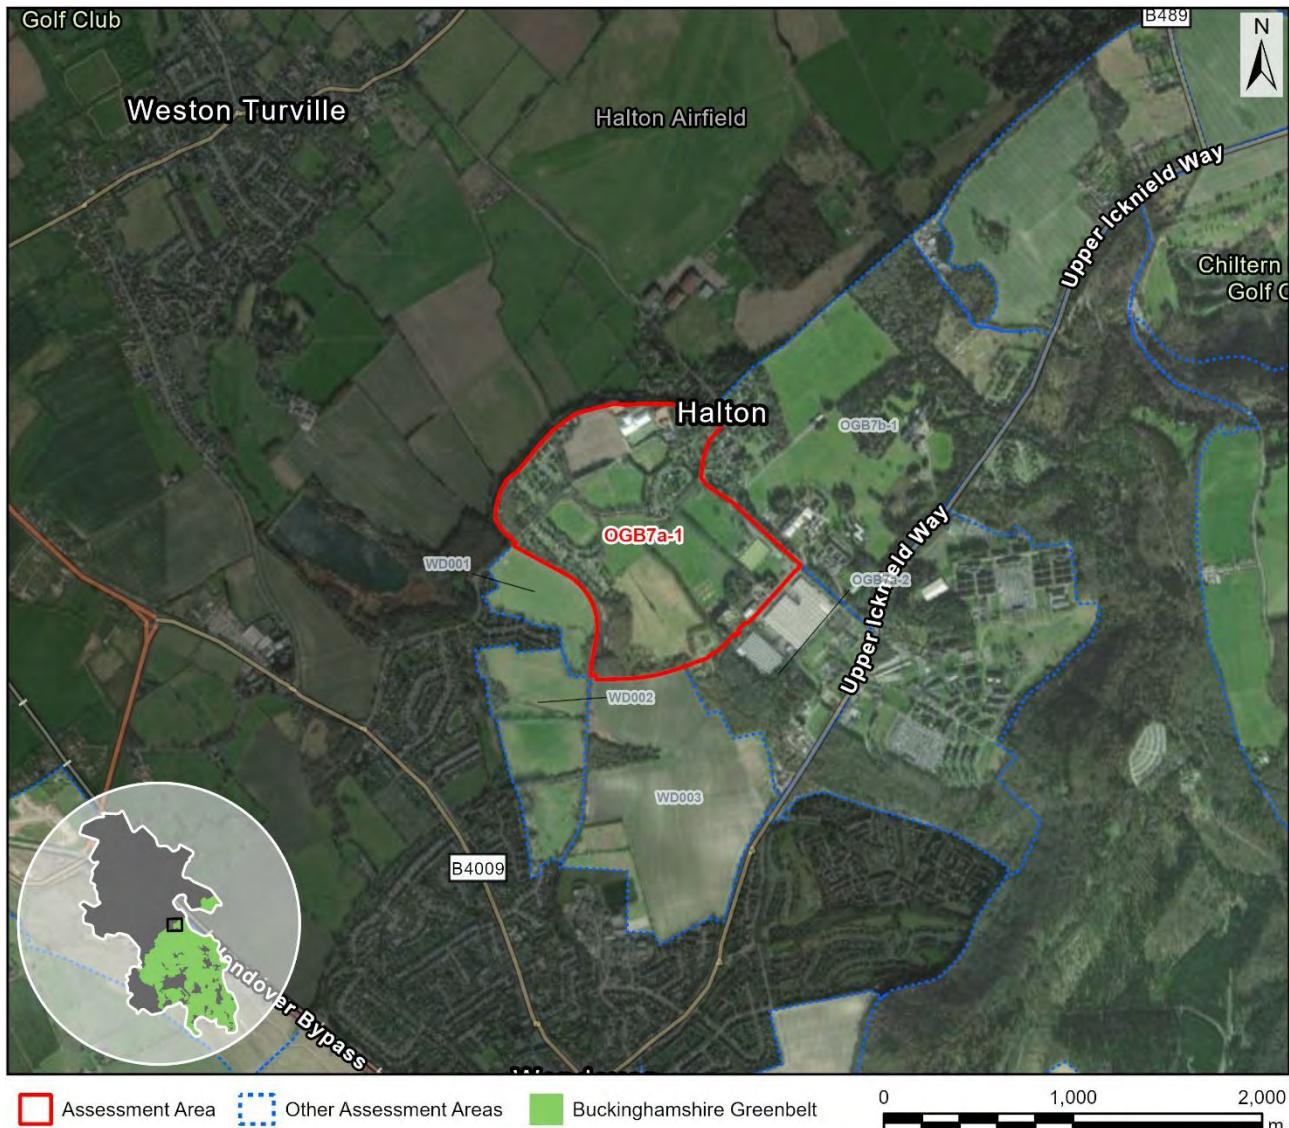

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Aston Clinton and Tring but makes limited contribution to appreciation of the gap. This is raised land, but there is limited or no visual connectivity between the towns and a substantial gap would remain were the AA to be developed.

| | |
|-------------------------|--|
| Purpose D | None: No notable contribution |
| National Landscape (NL) | Constrained: Within the NL |
| Flood risk | N/a: Already ruled out (NL) |
| Biodiversity | N/a: Already ruled out (NL) |
| Irreplaceable habitat | N/a: Already ruled out (NL) |
| Local Green Space | N/a: Already ruled out (NL) |
| Historic environment | N/a: Already ruled out (NL) |
| NL setting | N/a: Already ruled out (NL) |
| Conclusion | Not grey belt as the AA both makes a strong contribution to one or more of the relevant Green Belt purposes and is subject to footnote 7 constraint. |

Site OGB7a-1

Site Details

| | |
|------------|-----------------------|
| Reference | OGB7a-1 |
| Settlement | N/a |
| Conclusion | Provisional grey belt |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Aston Clinton and Wendover but makes limited contribution to appreciation of the gap, including noting distance from the main road link, albeit the canal is also a connecting feature.

Purpose D **None:** No notable contribution

National Landscape (NL) **Unconstrained:** Not within the NL

| | |
|-----------------------|---|
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Provisionally constrained: Around 200m at the closest point from Weston Turville Reservoir SSSI, although not very well linked (with no footpath along Halton Lane). In practice development would likely avoid the canal corridor, which would reduce concerns. |
| Irreplaceable habitat | Unconstrained (marginal): 1% ancient woodland and plus some wider priority habitat. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Provisionally constrained: A very large AA that intersects a conservation area at its eastern extent, and the eastern extent also abuts a registered park and garden that is on the heritage at risk register. Also strongly associated with the canal corridor although this is not listed. |
| NL setting | Provisionally constrained: 520m from the NL and assessed as within the NL setting. |
| Conclusion | Provisional grey belt due to footnote 7 constraint (BD, HE, NLS) |

Site OGB7a-2

Site Details

| | |
|------------|-----------------------|
| Reference | OGB7a-2 |
| Settlement | N/a |
| Conclusion | Provisional grey belt |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **Weak:** Significant onsite built form and partially enclosed by existing development. The boundaries are mostly quite strong, including noting priority habitat, but the north west boundary is weaker (not a historic field boundary). There would be a risk of undermining adjacent Green Belt.

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Aston Clinton and Wendover but makes limited contribution to appreciation of the gap. There is considerable built form (RAF Halton), albeit with an element of openness alongside the key road link.

Purpose D **None:** No notable contribution

National Landscape
(NL)

Unconstrained: Not within the NL

Flood risk

Unconstrained: No notable constraint

Biodiversity

Provisionally constrained: Proximity to a SSSI is less of a concern here relative to other Wendover AAs, but significant onsite priority habitat is of note. In practice this forms part of an allocation for 1,000 homes and work has been undertaken and remains ongoing regarding how best to avoid constraints. Within SAC impact zone.

Irreplaceable habitat

Provisionally constrained: 3% ancient woodland. The ancient woodland is centrally located and there is significant priority habitat linked to the ancient woodland. However, forms part of an allocation for 1,000 homes.

Local Green Space

Unconstrained: Not LGS

Historic environment

Unconstrained (marginal): Adjacent to a registered park and garden but that AA includes extensive modern built form.

NL setting

Provisionally constrained: 460m from the NL and assessed as within the NL setting.

Conclusion

Provisional grey belt due to footnote 7 constraint (BD, IH, NLS)

Site OGB7b-1

Site Details

| | |
|------------|---------------|
| Reference | OGB7b-1 |
| Settlement | N/a |
| Conclusion | Not grey belt |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Aston Clinton and Wendover but makes limited contribution to appreciation of the gap. This AA alongside that to the north together comprise the essential gap, but were this AA to be developed a substantial gap would remain to the north, which is the more sensitive area given long distance views across the Vale of Aylesbury.

Purpose D **None:** No notable contribution

National Landscape
(NL)

Unconstrained: Not within the NL

Flood risk

Unconstrained: No notable constraint

Biodiversity

Provisionally constrained: Proximity to Aston Raggits SSSI is potentially a concern, but it is noted that the SSSI is in favourable condition and recreational pressure is not listed as a known pressure by Natural England (it is managed as a nature reserve by the Wildlife Trust). It is a small SSSI visited by those with an interest in orchids, but less likely to be popular with dog walkers. Another consideration is onsite priority habitat woodland that will contribute to functional ecological connectivity at a landscape scale that includes SSSI woodlands. However, the potential to minimise concerns can be envisaged and potentially deliver benefits. Within SAC impact zone.

Irreplaceable habitat

Unconstrained (marginal): 1% ancient woodland. A large AA that includes a small ancient woodland and wider priority habitat.

Local Green Space

Unconstrained: Not LGS

Historic environment

Constrained: Mostly comprises a registered park and garden and outside of this there is a conservation area.

NL setting

N/a: Already ruled out (HE)

Conclusion

Not grey belt due to footnote 7 constraint (HE)

Site OGB7b-2-a

| Reference | OGB8e-2 |
| Settlement | N/a |
| Conclusion | Provisional grey belt |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Purpose B **None:** No notable contribution.

Purpose D **None:** No notable contribution

National Landscape (NL) **Unconstrained:** Marginally intersects the NL (<1%)

Flood risk **Unconstrained:** No notable constraint

| | |
|-----------------------|---|
| Biodiversity | Provisionally constrained: Within SAC impact zone. |
| Irreplaceable habitat | Provisionally constrained: Adjacent to and strongly associated with an ancient woodland LWS. A small AA but includes built form. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Unconstrained (marginal): Several listed buildings in the vicinity and potentially with visual links, but only one is near adjacent. The AA includes some modern built form. |
| NL setting | Provisionally constrained: Marginally intersects the NL and assessed as within the NL setting. |
| Conclusion | Provisional grey belt due to footnote 7 constraint (BD, IH, NLS) |

Site OGB8f-1

Assessment

Purpose A **None:** No notable contribution

Purpose B **Weak:** The AA comprises a substantial part of the gap between Chesham and Tring but very makes limited contribution to appreciation of the gap. Were the AA to be developed (unlikely given the National Landscape) a substantial gap would remain to the north.

Purpose D **None:** No notable contribution

National Landscape (NL) **Constrained:** Within the NL

| | |

Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Chesham and Great Missenden but makes limited contribution to appreciation of the gap. Were the AA to be developed (unlikely given the National Landscape) a substantial gap would remain to the west (but this remaining gap would be sensitive given topography and the village of South Heath).

Purpose D **Moderate:** Adjacent to and contributes moderately to the special character of the Chesham Old Town part of the Chesham Conservation Area, including

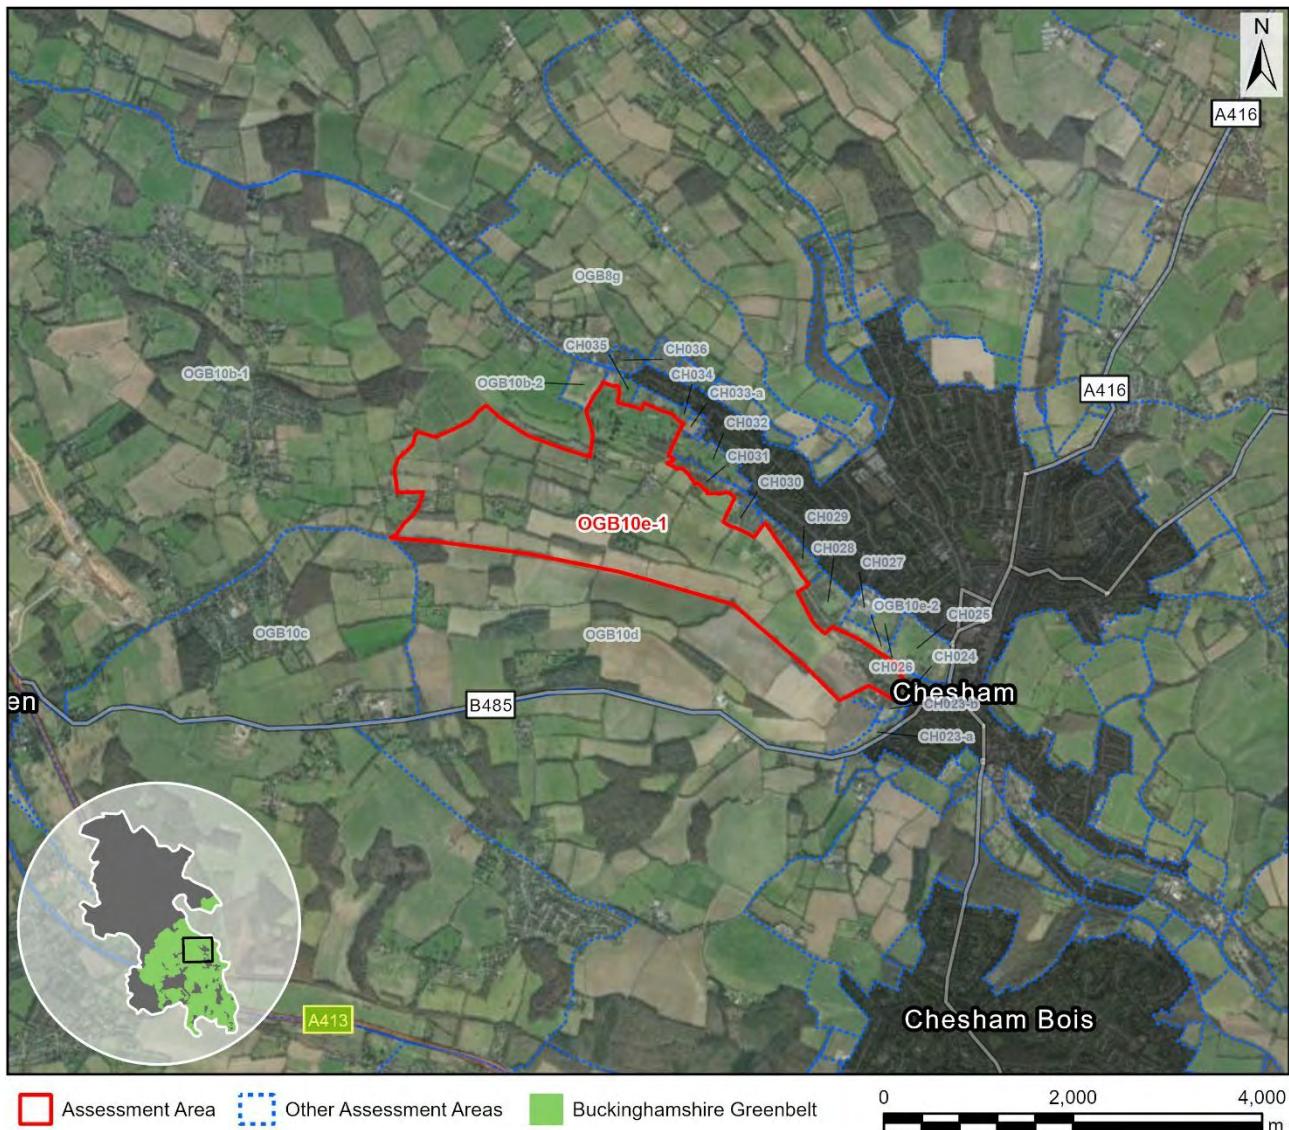

noting the characteristic topography of ridges and valleys. See further discussion in Section 4 of the main report.

Assessment

Purpose A **None:** No notable contribution

Purpose B **None:** No notable contribution.

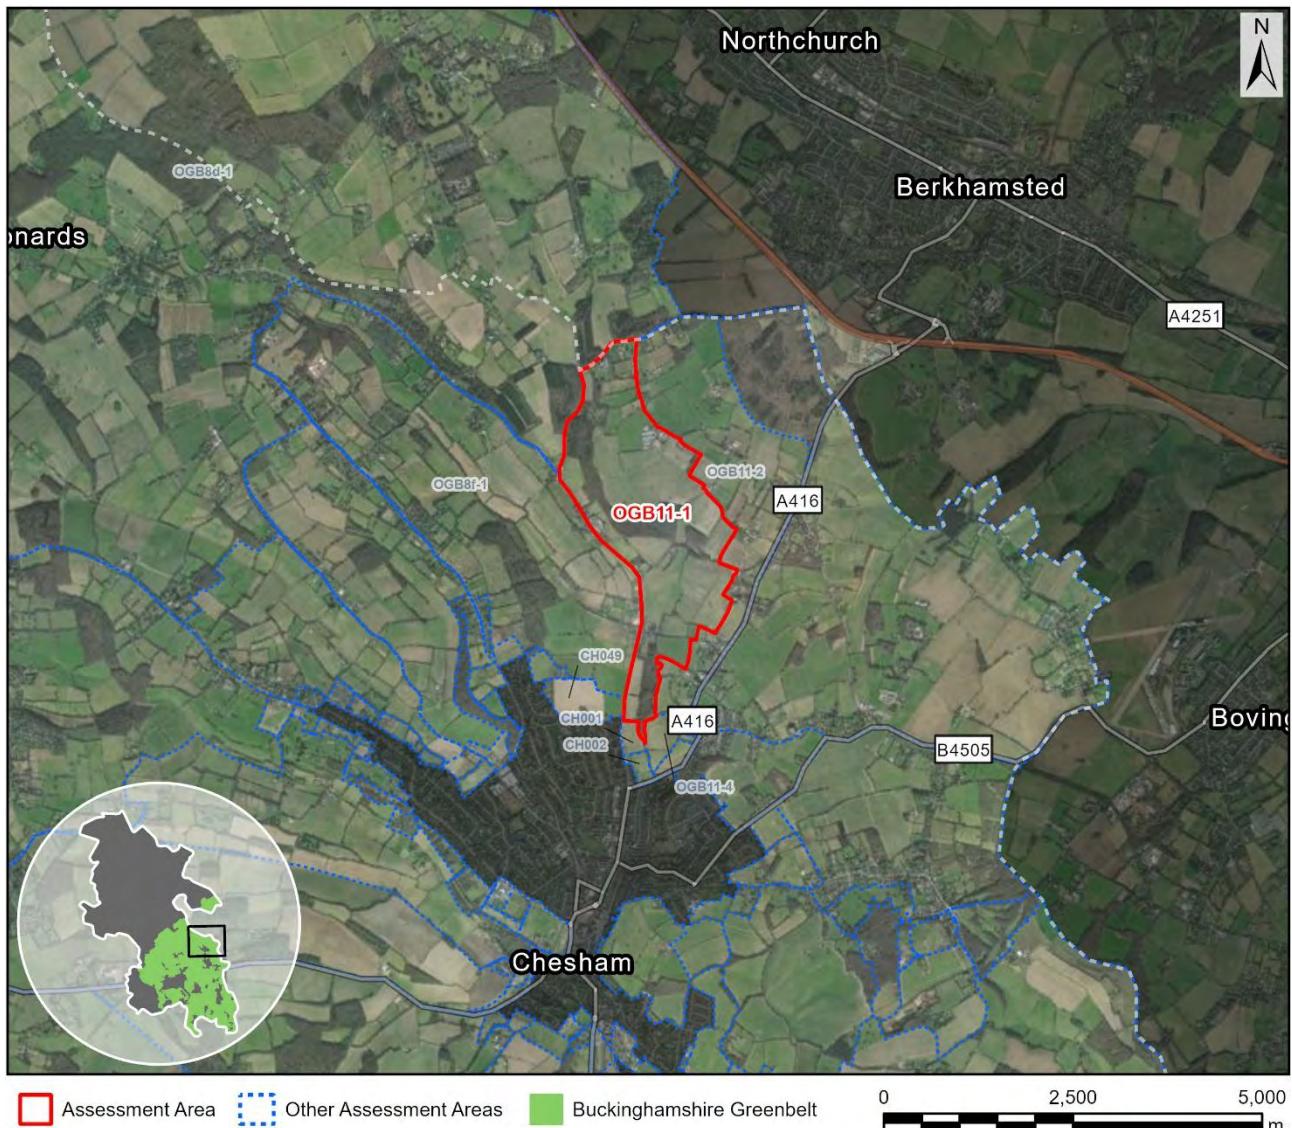

Purpose D **Moderate:** Separated from but contributes moderately to the special character of the Chesham Old Town part of the Chesham Conservation Area. Comprises part of a historic park on raised ground, the church is nearby and there is an adjacent scheduled monument. See further discussion in Section 4 of the main report.

| | |
|-------------------------|--|
| National Landscape (NL) | Unconstrained: Not within the NL |
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Provisionally constrained: Within SAC impact zone. |
| Irreplaceable habitat | Unconstrained: No notable constraint |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Provisionally constrained: Quite distant from a listed building and the conservation area, but forms part of a locally listed historic park plus the AA is close to a very well preserved bowl barrow scheduled monument. |
| NL setting | Provisionally constrained: Adjacent to the NL and assessed as within the NL setting. |
| Conclusion | Provisional grey belt due to footnote 7 constraint (BD, HE, NLS) |

Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Berkhamsted and Chesham but makes limited contribution to appreciation of the gap, including as it is not directly adjacent to the A416. Were the AA to be developed a substantial gap would remain to the north, and the AA is located within the NL such that any development would likely be limited.

Purpose D **None:** No notable contribution

National Landscape
(NL)

Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Berkhamsted and Chesham but makes limited contribution to appreciation of the gap. This is a sensitive area of raised land between the towns, but were the AA to be developed then a substantial gap would remain, including on account of the woodland to the north of the AA.

Purpose D **None:** No notable contribution

| | |
|-------------------------|---|
| National Landscape (NL) | Unconstrained: Not within the NL |
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Provisionally constrained: Within SAC impact zone. |
| Irreplaceable habitat | Unconstrained (marginal): 1% ancient woodland. A large linear AA adjacent to ancient woodland at either end. Limited onsite priority habitat and, in practice, there would be good potential to buffer the woodlands. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Provisionally constrained: Includes a notable series of listed buildings along the historic route between Chesham and Berkhamsted, including the small village of Ashley Green where there is a prominent grade II* listed church. |
| NL setting | Provisionally constrained: Adjacent to the NL and assessed as within the NL setting. |
| Conclusion | Provisional grey belt due to footnote 7 constraint (BD, HE, NLS) |

Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Berkhamsted and Chesham but makes limited contribution to appreciation of the gap. It is noted that the AA comprises a woodland that plays an important role marking the southern edge of Berkhamsted, given the relatively flat plateau landscape to the south (i.e. north of Chesham).

Purpose D **None:** No notable contribution

| | |
|-------------------------|--|
| National Landscape (NL) | Unconstrained: Not within the NL |
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Provisionally constrained: Within SAC impact zone. Comprises a blanket TPO. |

Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Berkhamsted and Chesham but makes limited contribution to appreciation of the gap. This is a sensitive area of raised land between the towns, but were the AA to be developed then a substantial gap would remain to the north of the AA.

Purpose D **None:** No notable contribution

| | |
|-------------------------|--|
| National Landscape (NL) | Unconstrained: Not within the NL |
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Provisionally constrained: Within SAC impact zone. Includes 18 TPOs. |
| Irreplaceable habitat | Provisionally constrained: 1.5% ancient woodland but this is quite centrally located within the AA. Could well contribute to functional ecological connectivity at the landscape scale, noting the wider landscape is one of small ancient woodland patches / fragments. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Provisionally constrained: A very large AA associated with a historically rural area with numerous dispersed listed buildings along historic lanes. In the centre is a cluster of listed buildings and a scheduled monument. Also, a second scheduled monument is located closer to the edge. The western part of the AA is less constrained including as influenced by the A416. |
| NL setting | Provisionally constrained: Near adjacent to the NL and assessed as within the NL setting. |
| Conclusion | Provisional grey belt due to footnote 7 constraint (BD, IH, HE, NLS) |

Site OGB18b

Site Details

| | |
|------------|---------------|
| Reference | OGB18b |
| Settlement | N/a |
| Conclusion | Not grey belt |

Assessment

Purpose A

Moderate: Limited onsite built form (historic) and only very partially enclosed by existing development. There is containment to the east by the A416 and to the south by woodland, rising land and a historic field boundary. In conclusion, judged moderate having accounted for onsite built form alongside a view that development would, on balance, not be incongruous. However, development would risk undermining adjacent Green Belt.

Purpose B

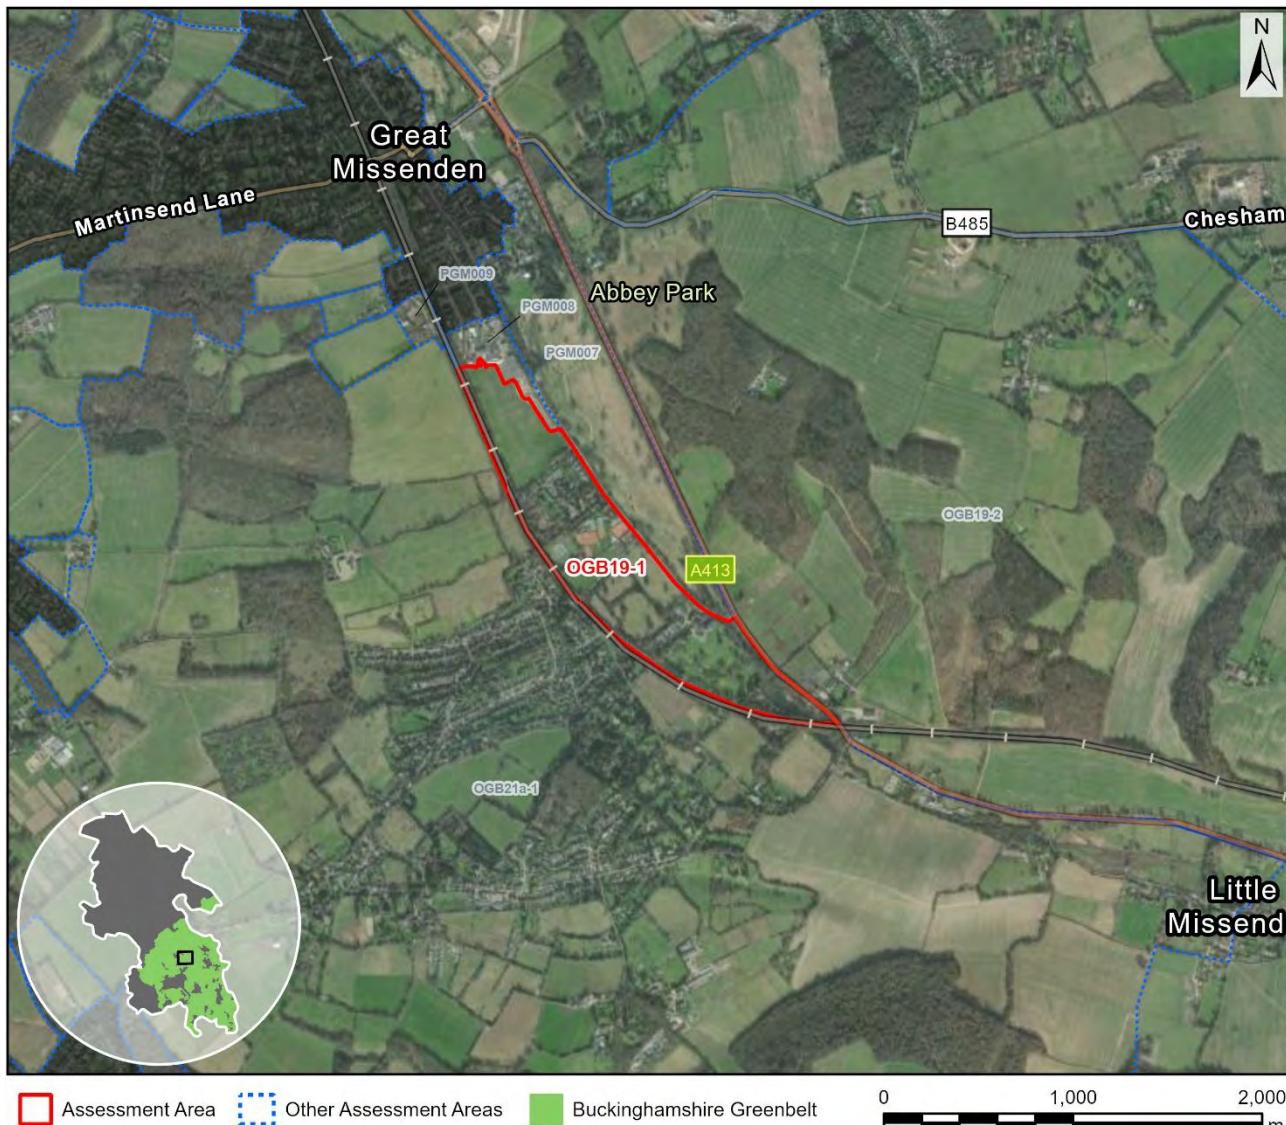

Moderate: The AA comprises a substantial part of the gap between Amersham and Chesham but makes limited contribution to appreciation of the gap. The AA is associated with the A416, which is a key link between the towns, but there is some onsite built form (albeit largely historic).

| | |
|-------------------------|---|
| Purpose D | None: No notable contribution |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Purpose B **Weak:** The AA comprises a substantial part of the gap between High Wycombe and Prestwood / Great Missenden but makes very limited contribution to appreciation of the gap, including given the adjacent train line. However, there is extensive washed over built form to the south, which adds to the sensitivity of the gap.

Purpose D **Weak:** Adjacent to the Great Missenden Conservation Area but makes limited contribution to Great Missenden as a historic town. See further discussion in Section 4 of the main report.

Assessment

| | |
|-----------|--|
| Purpose A | None: No notable contribution |
| Purpose B | Moderate: The AA comprises a substantial part of the gap between Amersham and Great Missenden but this is a large AA in the National Landscape with a range of features that could be drawn upon to maintain a substantial gap. |
| Purpose D | Moderate: Significantly intersects and contributes moderately to the special character of the Great Missenden Conservation Area. The AA includes the grade 1 listed church, but this is separated from the core of the |

conservation area by the A413 (albeit it is easily accessible). See further discussion in Section 4 of the main report.

| | |
|-------------------------|---|

| Reference | OGB21a-1 |
| Settlement | N/a |
| Conclusion | Not grey belt |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Purpose B **Strong:** The AA comprises a substantial part of the gap between High Wycombe and Prestwood / Great Missenden and makes a significant contribution to appreciation of the gap. Whilst this is a large AA within the National Landscape with a range of features that could be drawn upon to preserve separation, the gap is considered to be sensitive given the extent of built form and because this is something of a flatter plateau landscape in the context of the wider Chilterns.

| | |
|-------------------------|---|
| Purpose D | Weak: Raised ground in proximity to the Great Missenden Conservation Area but makes limited contribution to its significance as a historic town. See further discussion in Section 4 of the main report. |
| National Landscape (NL) | Constrained: Within the NL |

Assessment

Purpose A **None:** No notable contribution

Purpose B **Strong:** The AA comprises a substantial part of the gap between Amersham and Little Chalfont and makes a significant contribution to appreciation of the gap. The AA is associated with the Misbourne Valley with extensive views from raised ground on either side of the valley. Also, two public rights of way run adjacent to the AA that somewhat link the towns.

Purpose D **None:** No notable contribution

National Landscape
(NL)

Unconstrained: Not within the NL

Flood risk

Unconstrained: No notable constraint

Biodiversity

Provisionally constrained: Partly within SAC impact zone.

Irreplaceable habitat

Provisionally constrained: 9% ancient woodland, specifically two ancient woodland patches that function as part of a network along the valley side.

Local Green Space

Unconstrained: Not LGS

Historic environment

Unconstrained: No notable constraint

NL setting

Unconstrained: Adjacent to the NL but assessed as outside the NL setting.

Conclusion

Not grey belt as the AA makes a strong contribution to one or more of the relevant Green Belt purposes.

Assessment

Purpose A **None:** No notable contribution

Strong: The AA comprises a substantial part of the gap between Chorleywood and Little Chalfont and makes a significant contribution to appreciation of the gap. The adjacent A404 is a key link and there are some long distance views south from the road, and it is noted that the Chiltern Way passes through the AA. Only small and fragile gaps would remain to the west and to the east, although it is noted that the AA is within the National Landscape such that any development would likely be restricted. It is also noted that part of the AA appears to comprise a former golf course, and this part of the AA is flatter land distinct from the valley to the west.

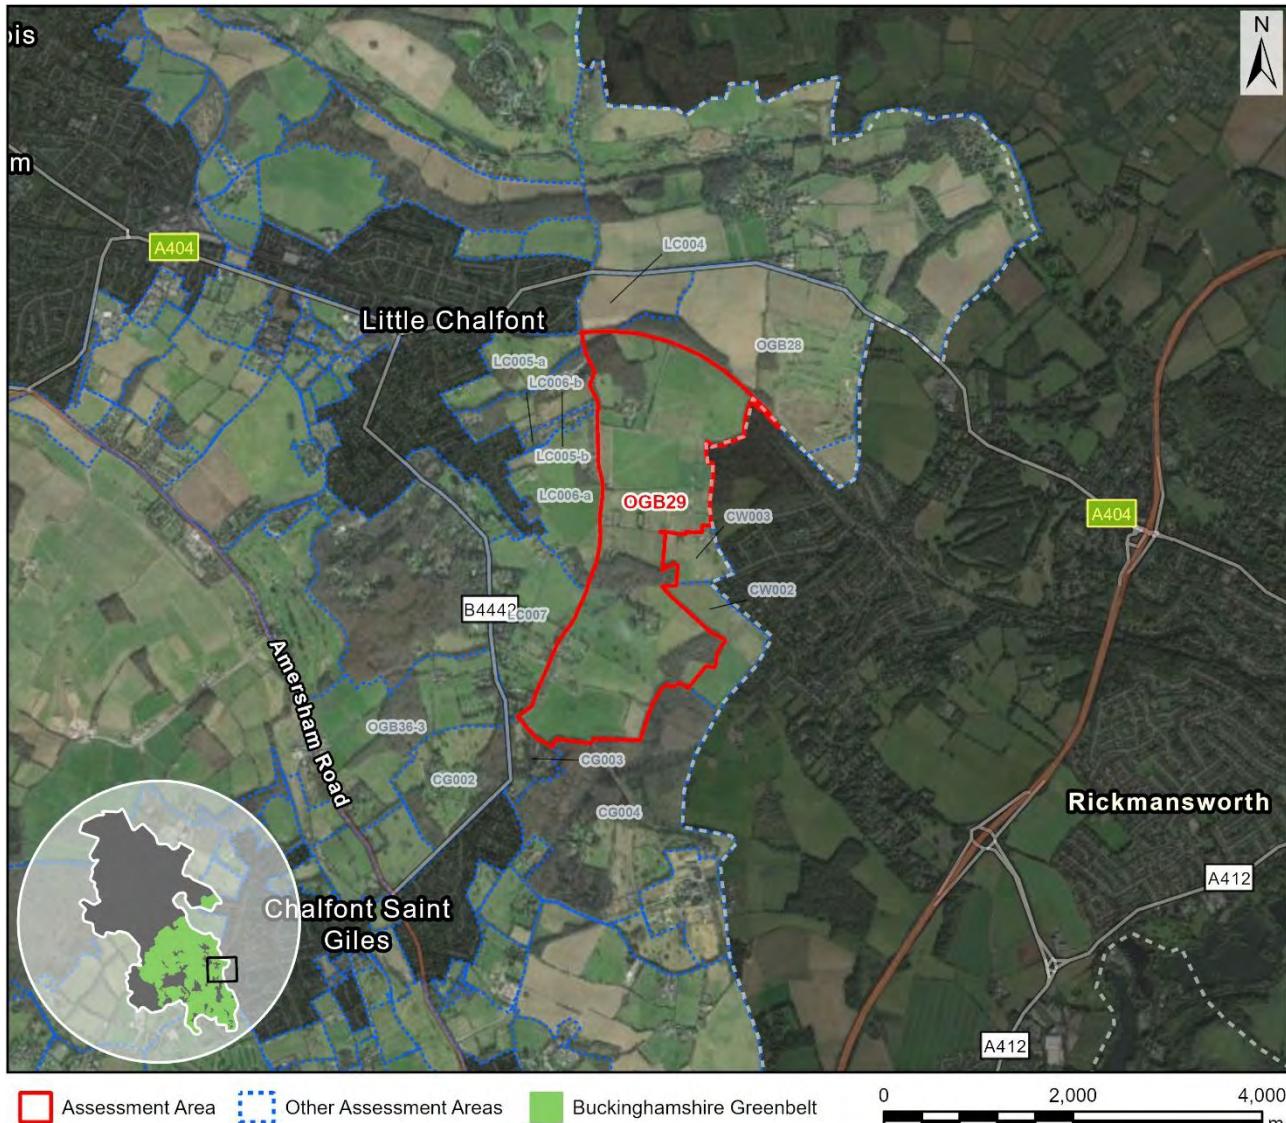

Purpose B

| | |
|-------------------------|--|
| Purpose D | None: No notable contribution |
| National Landscape (NL) | Constrained: Within the NL |
| Flood risk | N/a: Already ruled out (NL) |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Purpose B **Strong:** The AA comprises a substantial part of the gap between Amersham and Chalfont St. Giles and makes a significant contribution to appreciation of the gap. The AA is associated with A413, which is the key link between the towns, and also the Misbourne Valley with extensive views from raised ground on either side of the valley.

Purpose D **Weak:** Raised ground in proximity to Old Amersham, and visible in views along the Misbourne Valley that also take in the Church / Old Town, but

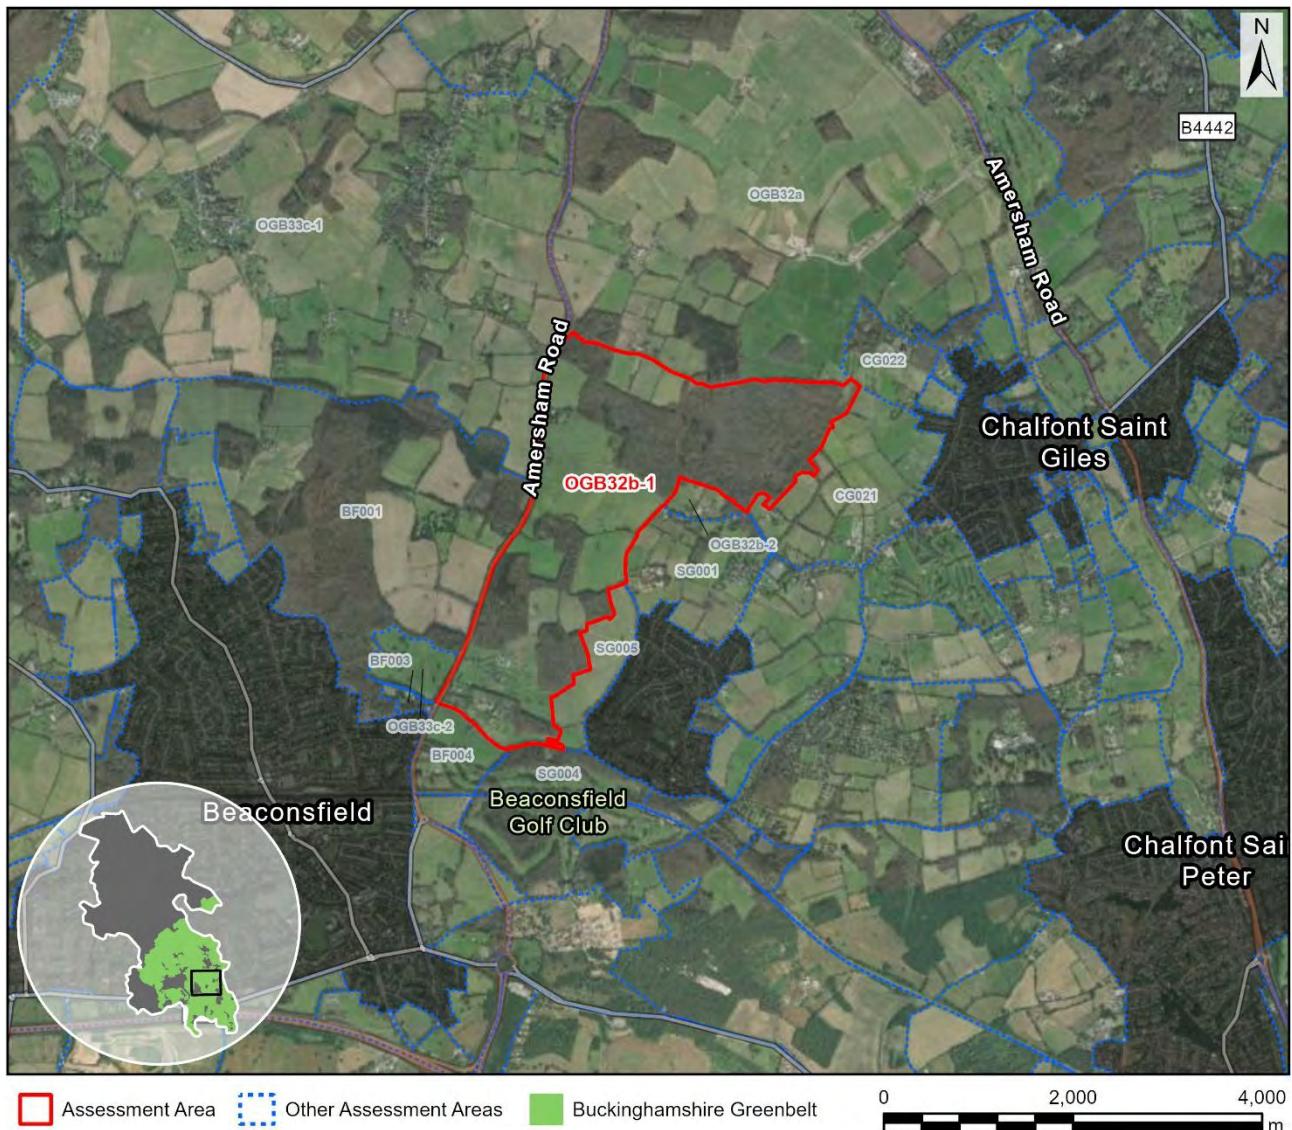

separated from the Conservation Area by modern built form and infrastructure. See further discussion in Section 4 of the main report.

| | |
|-------------------------|--|
| National Landscape (NL) | Constrained: Within the NL |
| Flood risk | N/a: Already ruled out (NL) |
| Biodiversity | N/a: Already ruled out (NL) |
| Irreplaceable habitat | N/a: Already ruled out (NL) |
| Local Green Space | N/a: Already ruled out (NL) |
| Historic environment | N/a: Already ruled out (NL) |
| NL setting | N/a: Already ruled out (NL) |
| Conclusion | Not grey belt as the AA both makes a strong contribution to one or more of the relevant Green Belt purposes and is subject to footnote 7 constraint. |

Assessment

Purpose A **None:** No notable contribution

Purpose B **Strong:** The AA comprises a substantial part of the gap between Amersham, Chalfont St. Giles and Little Chalfont and, whilst it makes a limited contribution to appreciation either of the gaps in isolation (gaps would remain were the AA to be developed), its contribution to the gaps in combination is considered to be significant. The AA is associated with A413, which is the key link between the towns, and also the Misbourne Valley with extensive views from raised ground on either side of the valley.

Purpose D **None:** No notable contribution

National Landscape
(NL)

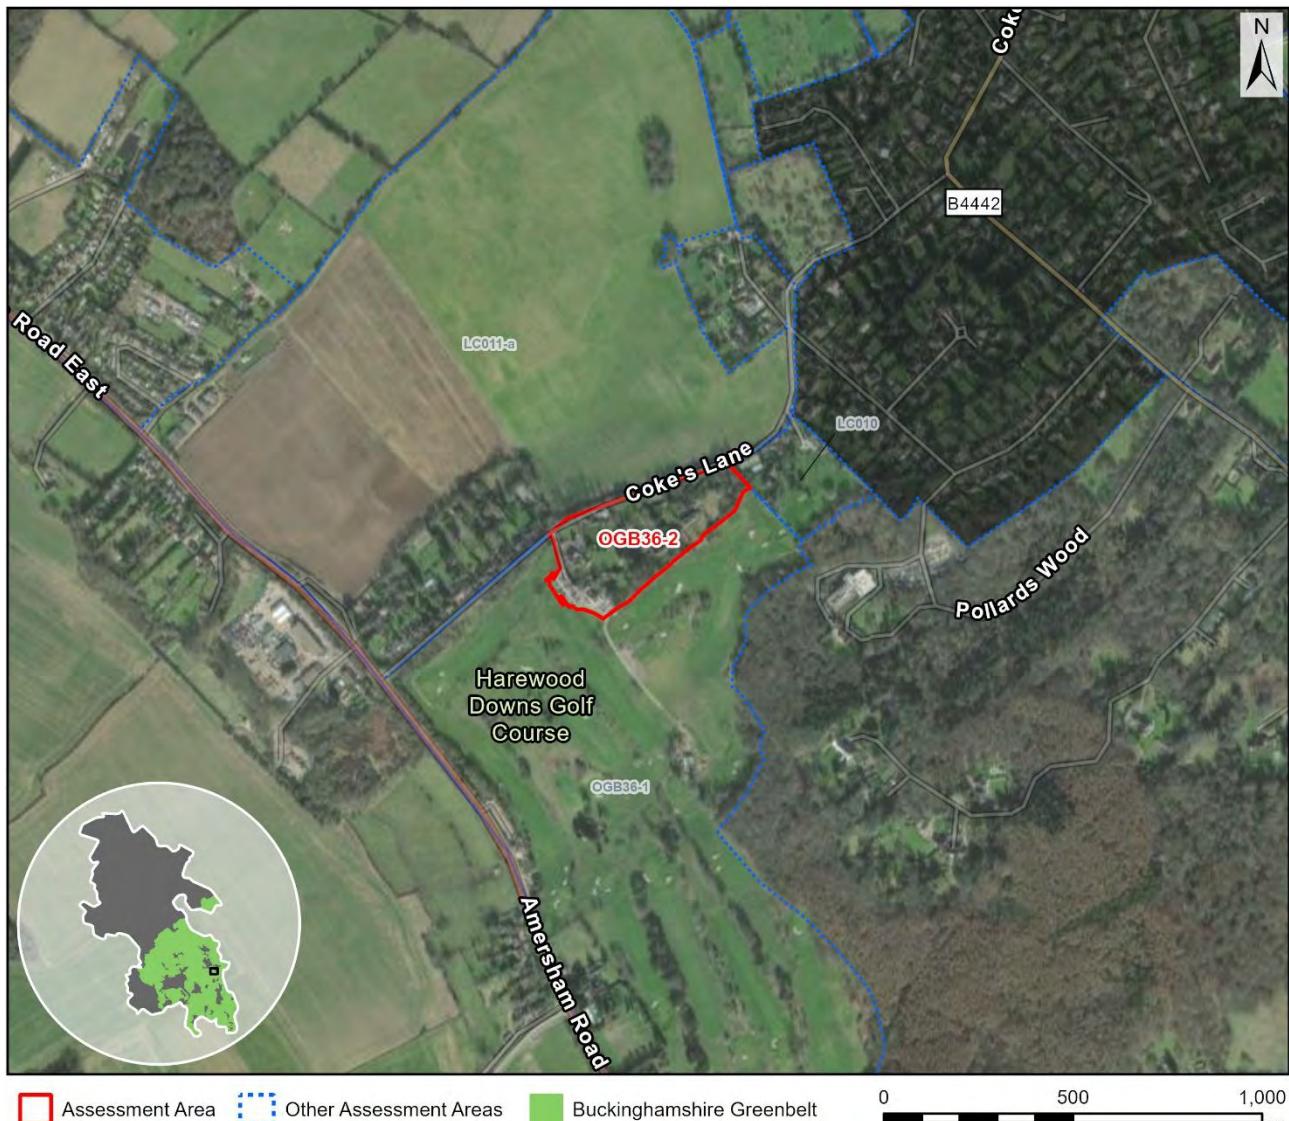

Constrained: Within the NL

| | |
|-----------------------|--|
| Flood risk | N/a: Already ruled out (NL) |
| Biodiversity | N/a: Already ruled out (NL) |

Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Amersham and Little Chalfont but makes limited contribution to appreciation of the gap. The AA includes built form, but this is primarily a golf club, and there are extensive views across the Misbourne Valley. Development could risk a sense of continual built form between the towns (having accounted for extensive washed over built form).

Purpose D **None:** No notable contribution

National Landscape

Assessment

Moderate: The AA comprises a substantial part of the gap between Amersham, Chalfont St. Giles and Little Chalfont and, but makes limited contribution to appreciation either of the gaps, in that substantial gaps would remain were the AA to be developed. However, it is acknowledged that the AA is associated with: A) the A413, which is a key link; B) the Misbourne Valley with extensive views from raised ground on either side of the valley; and C) Nightingales Lane, which is a key link and sensitive on account of existing built form.

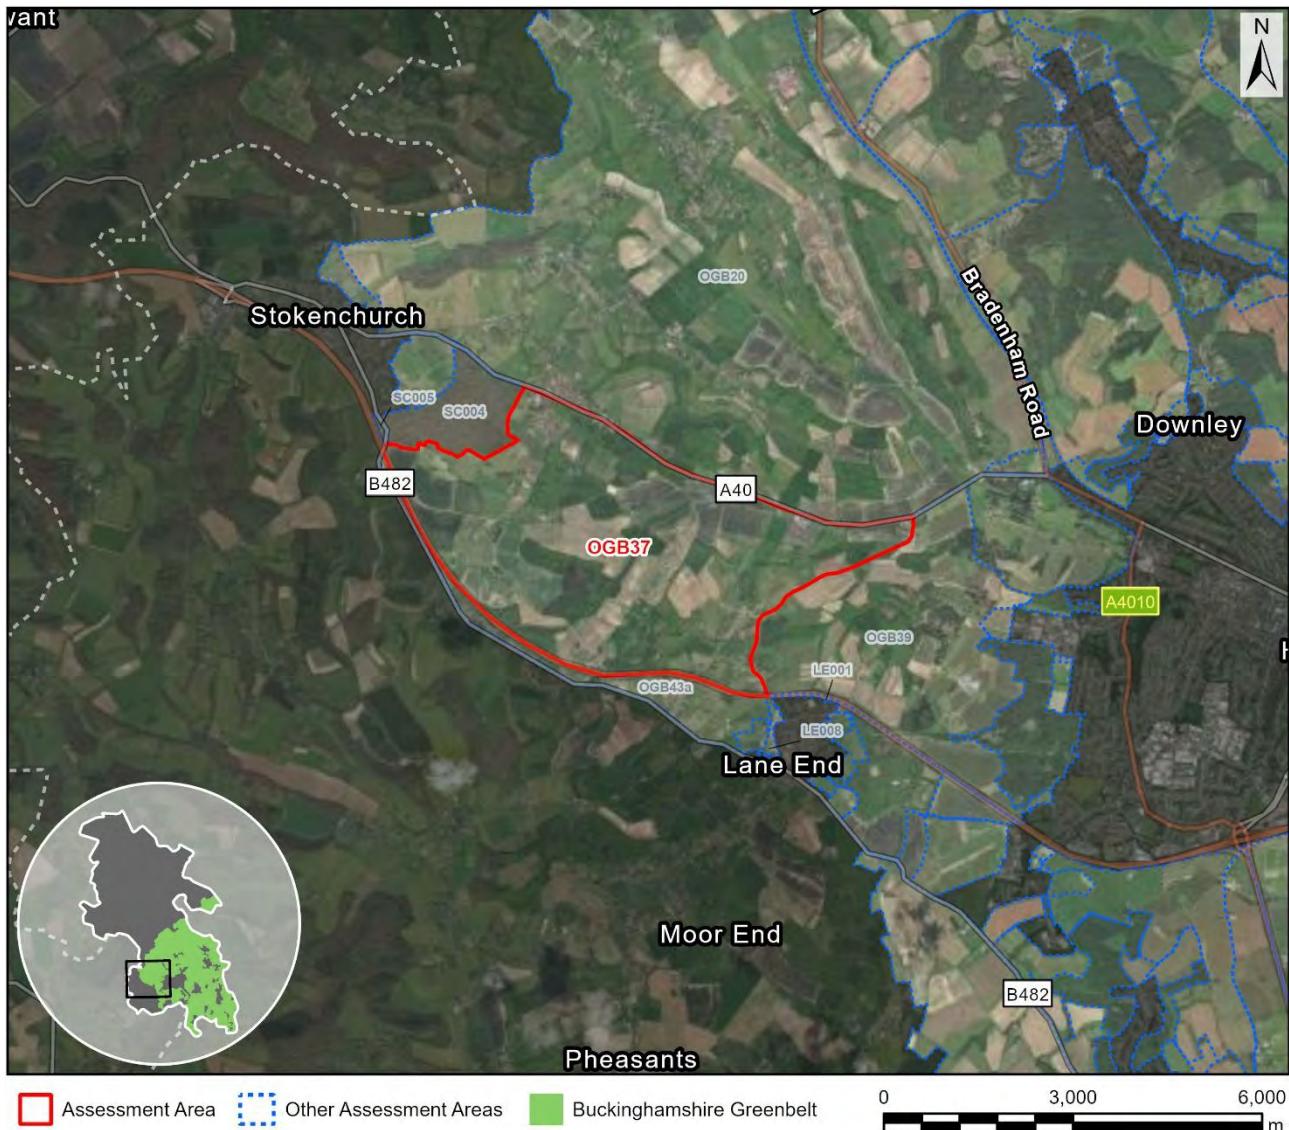

Purpose B

Settlement N/a

Conclusion Provisional grey belt

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Chalfont St. Giles and Chalfont St. Peter but makes limited contribution to appreciation of the gap. Chesham Lane is an important link between the settlements, but there would be potential to maintain a substantial settlement gap.

Purpose D **None:** No notable contribution

| | |
|-------------------------|--|
| National Landscape (NL) | Unconstrained: Not within the NL |
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Unconstrained: No notable constraint |
| Irreplaceable habitat | Unconstrained (marginal): Abuts an ancient woodland, but this is a large AA and the woodland abuts just a small part of the boundary, plus it is separated by a road and there would be good potential to buffer the woodland. Veteran trees at the edge of the AA. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Unconstrained (marginal): A large AA with a degree of historic character in that it is attractive and accessible countryside between Chalfont St Peter (including the National Epilepsy Centre, which has a degree of heritage value) and locally listed Newlands Park; also between Chalfont St Peter and historic lanes to the east, along which there are listed buildings (also one locally listed). The northern part of the AA is likely most sensitivity as it includes the driveway to Newlands Park, and this forms part of the Chiltern Way, although the sensitivity of Newlands Park is reduced on account of recent development. Finally, it is noted that an obelisk (not listed or locally listed) adds to the connection between Chalfont St Peter and Newlands Park. Overall the key consideration is that there are no listed assets within the AA and there would be potential to mitigate impacts to those around its edge. |
| NL setting | Provisionally constrained: Adjacent to the NL and assessed as within the NL setting. |
| Conclusion | Provisional grey belt due to footnote 7 constraint (NLS) |

Assessment

Purpose A **None:** No notable contribution

Purpose B **Weak:** The AA comprises a substantial part of the gap between Chalfont St. Peter / Gerrards Cross and London but makes very limited contribution to appreciation of the gap. The gap is sensitive on account of washed over built form and major road corridors (also the train line), but the AA is not associated with the main connecting road corridors (but is adjacent to the train line).

Purpose D **None:** No notable contribution

National Landscape
(NL)

Unconstrained: Not within the NL

Flood risk

Unconstrained: No notable constraint

Biodiversity

Provisionally constrained: 300m from a SSSI at its closest point and includes significant priority habitat. However, limited connectivity given intervening railway and built form, and it is noted the priority habitat (golf course) is not shown on historic mapping.

Irreplaceable habitat

Unconstrained (marginal): A large AA that abuts an ancient woodland to a small extent. However, comprises extensive wider priority habitat and is located between ancient woodlands.

Local Green Space

Unconstrained: Not LGS

Historic environment

Unconstrained: A large AA with one grade 2 listed building near adjacent.

NL setting

Unconstrained: Distant from the NL (beyond 2km)

Conclusion

Provisional grey belt due to footnote 7 constraint (BD)

Assessment

Purpose A **None:** No notable contribution

Purpose B **None:** No notable contribution.

Purpose D **None:** No notable contribution

National Landscape (NL) **Unconstrained:** Not within the NL

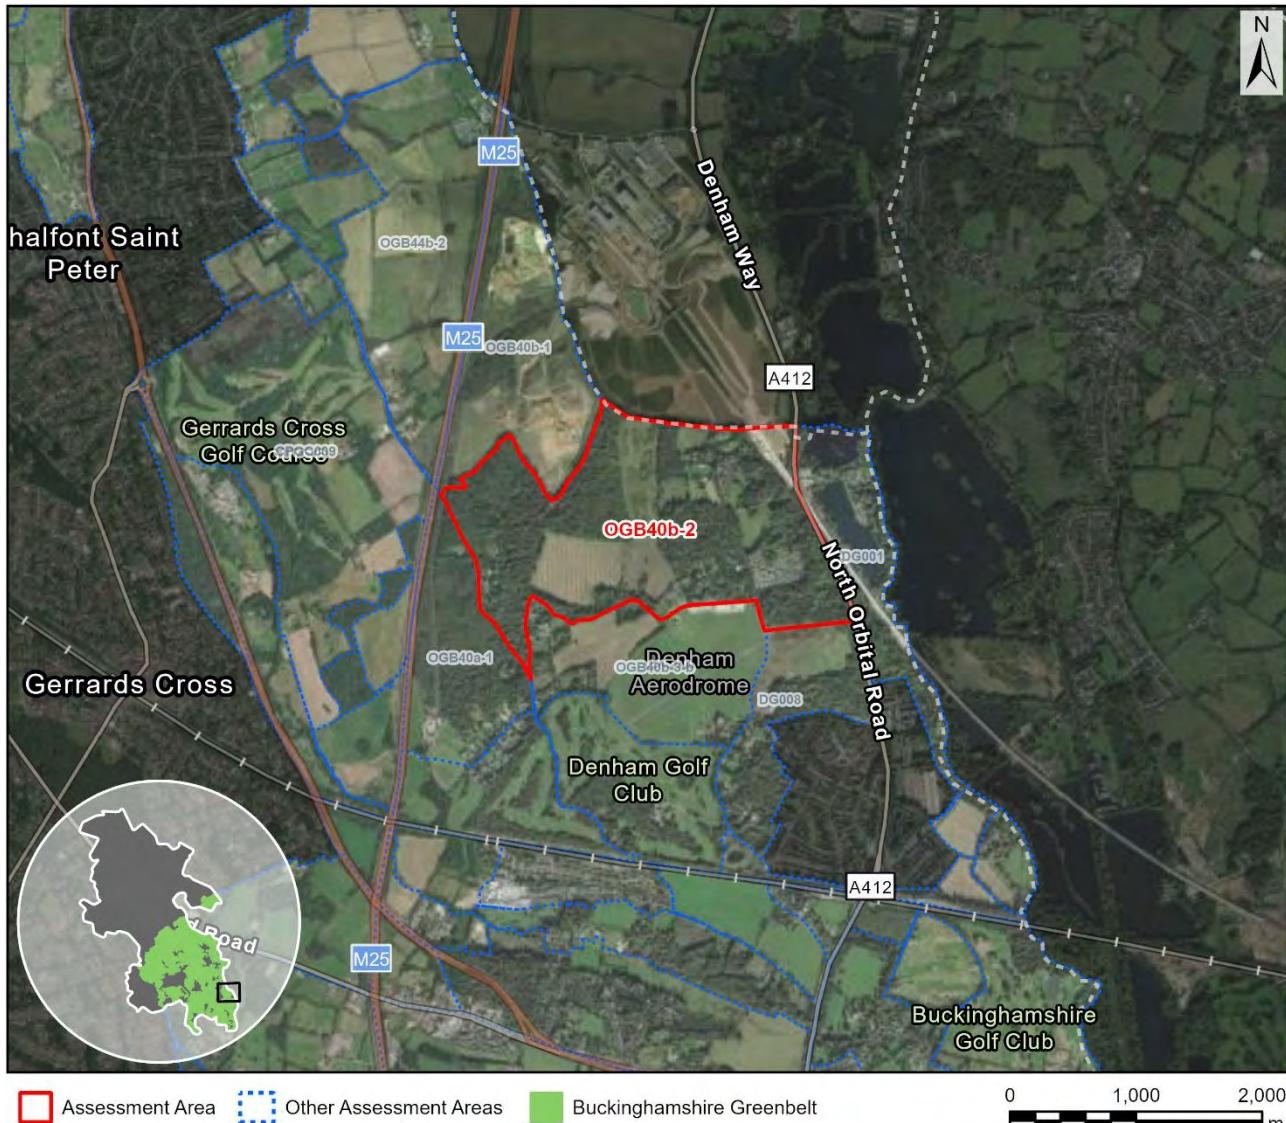

Flood risk **Unconstrained:** No notable constraint

| | |
|-----------------------|--|
| Biodiversity | Unconstrained: No notable constraint |
| Irreplaceable habitat | Provisionally constrained: Partially abuts ancient woodland. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Unconstrained: No notable constraint |
| NL setting | Unconstrained: 1000-2000m from the NL and considered unlikely to fall within the NL setting (not assessed in detail). |
| Conclusion | Provisional grey belt due to footnote 7 constraint (IH) |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imagery used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Weak: The AA comprises a substantial part of the gap between Chalfont St. Peter / Gerrards Cross and London but makes very limited contribution to appreciation of the gap. The gap is sensitive on account of washed over built form and major road corridors (also the train line), and the AA includes open farmland that is briefly visible from the but the AA is not associated with the main connecting road corridors (but is adjacent to the train line). Onsite ancient woodland and wider woodland could act to restrict and contain any development.

Purpose B

| | |
|-------------------------|---|
| Purpose D | None: No notable contribution |
| National Landscape (NL) | Unconstrained: Not within the NL |
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Provisionally constrained: Around 200m from a SSSI and contains priority habitat including ancient woodland. There is an intervening railway line but potentially a degree of hydrological connectivity noting a stream corridor linking to the SSSI. The SSSI (Old Rectory Meadows) is largely in unfavourable declining condition. |
| Irreplaceable habitat | Provisionally constrained: 12% ancient woodland plus significant wider priority habitat. Likely contributes to connectivity between ancient woodland patches at the landscape scale. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Unconstrained: A large AA adjacent to one listed building. |
| NL setting | Unconstrained: Distant from the NL (beyond 2km) |
| Conclusion | Provisional grey belt due to footnote 7 constraint (BD, IH) |

Assessment

Purpose A **None:** No notable contribution

Purpose B **None:** No notable contribution.

Purpose D **None:** No notable contribution

National Landscape (NL) **Unconstrained:** Not within the NL

Flood risk **Unconstrained:** No notable constraint

| | |
|-----------------------|--|
| Biodiversity | Unconstrained (marginal): A large AA that is around 450m from a SSSI, but there are few concerns noting that the AA comprises an airfield, plus the A412 is a barrier to accessing the SSSI and there is little to indicate that hydrological connectivity would be an issue. |
| Irreplaceable habitat | Provisionally constrained: 1% ancient woodland and limited wider priority habitat. Notably located in between numerous patches of ancient woodland. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Unconstrained: A large AA that comprises an aerodrome. There is a cluster of two listed buildings at the very edge of the AA, which can likely be appreciated from an important bridleway. |
| NL setting | Unconstrained: Distant from the NL (beyond 2km) |
| Conclusion | Provisional grey belt due to footnote 7 constraint (IH) |

Assessment

Purpose A **None:** No notable contribution

Purpose B **Weak:** The AA comprises a small part of the gap between Beaconsfield and Chalfont St. Peter / Gerrards Cross and makes very limited contribution to appreciation of the gap. A large rural gap would remain, particularly to the east (south of Welders Lane).

Purpose D **None:** No notable contribution

National Landscape (NL) **Unconstrained:** Not within the NL

| | |
|-----------------------|---|
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Provisionally constrained: Within SAC impact zone. |
| Irreplaceable habitat | Unconstrained (marginal): Abuts a LWS ancient woodland but only to a limited extent. Includes some wider priority habitat. A central location between a series of ancient woodlands. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Unconstrained: No notable constraint |
| NL setting | Unconstrained: 500-1000m from the NL and considered unlikely to fall within the NL setting (not assessed in detail). |
| Conclusion | Provisional grey belt due to footnote 7 constraint (BD) |

Site OGB41a-2

Reference OGB41a-2

Settlement N/a

Conclusion Not grey belt

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Purpose B **Weak:** The AA comprises a small part of the gap between Beaconsfield and Chalfont St. Peter / Gerrards Cross and makes very limited contribution to appreciation of the gap. A large rural gap would remain, particularly to the east (south of Welders Lane).

Purpose D **None:** No notable contribution

National Landscape (NL) **Unconstrained:** Not within the NL

| | |
|-----------------------|---|
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Provisionally constrained: Within SAC impact zone. Around 50% blanket TPO and a Local Wildlife Site. |
| Irreplaceable habitat | Constrained: 35% ancient woodland plus wider priority habitat. The woodland is a designated Local Wildlife Site and there is significant adjacent and nearby ancient woodland. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | N/a: Already ruled out (IH) |
| NL setting | N/a: Already ruled out (IH) |
| Conclusion | Not grey belt due to footnote 7 constraint (IH) |

Settlement N/a

Conclusion Not grey belt

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Beaconsfield and Chalfont St. Peter / Gerrards Cross but makes limited contribution to appreciation of the gap. Whilst development would impact the sense of settlement separation given existing development in the Seer Green / Jordans area, significant gaps would remain at the edge of Beaconsfield and Chalfont St. Peter.

Purpose D **None:** No notable contribution

| | |
|-------------------------|--|
| National Landscape (NL) | Unconstrained: Not within the NL |
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Provisionally constrained: Within SAC impact zone. Includes 10 TPOs. |
| Irreplaceable habitat | Provisionally constrained: 5% ancient woodland. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | <p>Constrained (marginal): Includes the characteristic village of Jordans (see discussion of the unique heritage here: www.archaeologyuk.org/resource/jordans-village-heritage-walk.html) including the prominent grade 1 listed Quaker Meeting House, which is a visitor destination, and which benefits from a clear setting in the landscape. Outside of the conservation area there is a cluster of listed buildings at the edge of the AA, and another cluster is nearby. There is a youth hostel here and a network of footpaths, and the area is easily reached from London by train. However, there is extensive non-designated built form outside of the conservation area.</p> |
| NL setting | N/a: Already ruled out (HE) |
| Conclusion | Not grey belt due to footnote 7 constraint (HE) |

Settlement N/a

Conclusion Grey belt

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Moderate: The AA comprises a substantial part of the gap between Chalfont St. Giles and Chalfont St. Peter but makes limited contribution to appreciation of the gap, including noting existing built form and woodland to the south. The AA also makes a limited contribution to the gap between Chalfont St. Giles and Beaconsfield noting that Twitchells Lane is an important link with a rural character associated with Jordans and its Quaker Meeting House.

Purpose D **None:** No notable contribution

| | |
|-------------------------|--|
| National Landscape (NL) | Unconstrained: Not within the NL |
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Unconstrained: Clips SAC impact zone. |
| Irreplaceable habitat | Unconstrained: No notable constraint |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Unconstrained (marginal): Includes a cluster of two listed buildings, but these are set back from the road and so not very prominent (although there is a nearby footpath). |
| NL setting | Unconstrained: 500-1000m from the NL and considered unlikely to fall within the NL setting (not assessed in detail). |
| Conclusion | Grey belt as the AA does not make a strong contribution to any of the relevant Green Belt purposes and is judged unconstrained in terms of NPPF footnote 7. |

| Reference | OGB41b-1 |
| Settlement | N/a |
| Conclusion | Not grey belt |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imagery used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

| | |
|-------------------------|---|
| Purpose A | None: No notable contribution |
| Purpose B | Strong: The AA comprises a substantial part of the gap between Chalfont St. Giles and Chalfont St. Peter and makes a significant contribution to appreciation of the gap. Whilst there is onsite built form this is partly agricultural, and the AA sits in between two lanes that link the settlements. |
| Purpose D | None: No notable contribution |
| National Landscape (NL) | Unconstrained: Not within the NL |

| | |
|-----------------------|---|
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Unconstrained: No notable constraint |
| Irreplaceable habitat | Unconstrained: No notable constraint |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Unconstrained: There is a near adjacent cluster of three listed buildings but set back from the road. |
| NL setting | Unconstrained: 500-1000m from the NL and considered unlikely to fall within the NL setting (not assessed in detail). |
| Conclusion | Not grey belt as the AA makes a strong contribution to one or more of the relevant Green Belt purposes. |

Assessment

Purpose A **None:** No notable contribution

Purpose B **Moderate:** The AA comprises a substantial part of the gap between Chalfont St. Giles and Chalfont St. Peter but makes limited contribution to appreciation of the gap. There is significant onsite built form, although it is important to note views across the valley in this area.

Purpose D **None:** No notable contribution

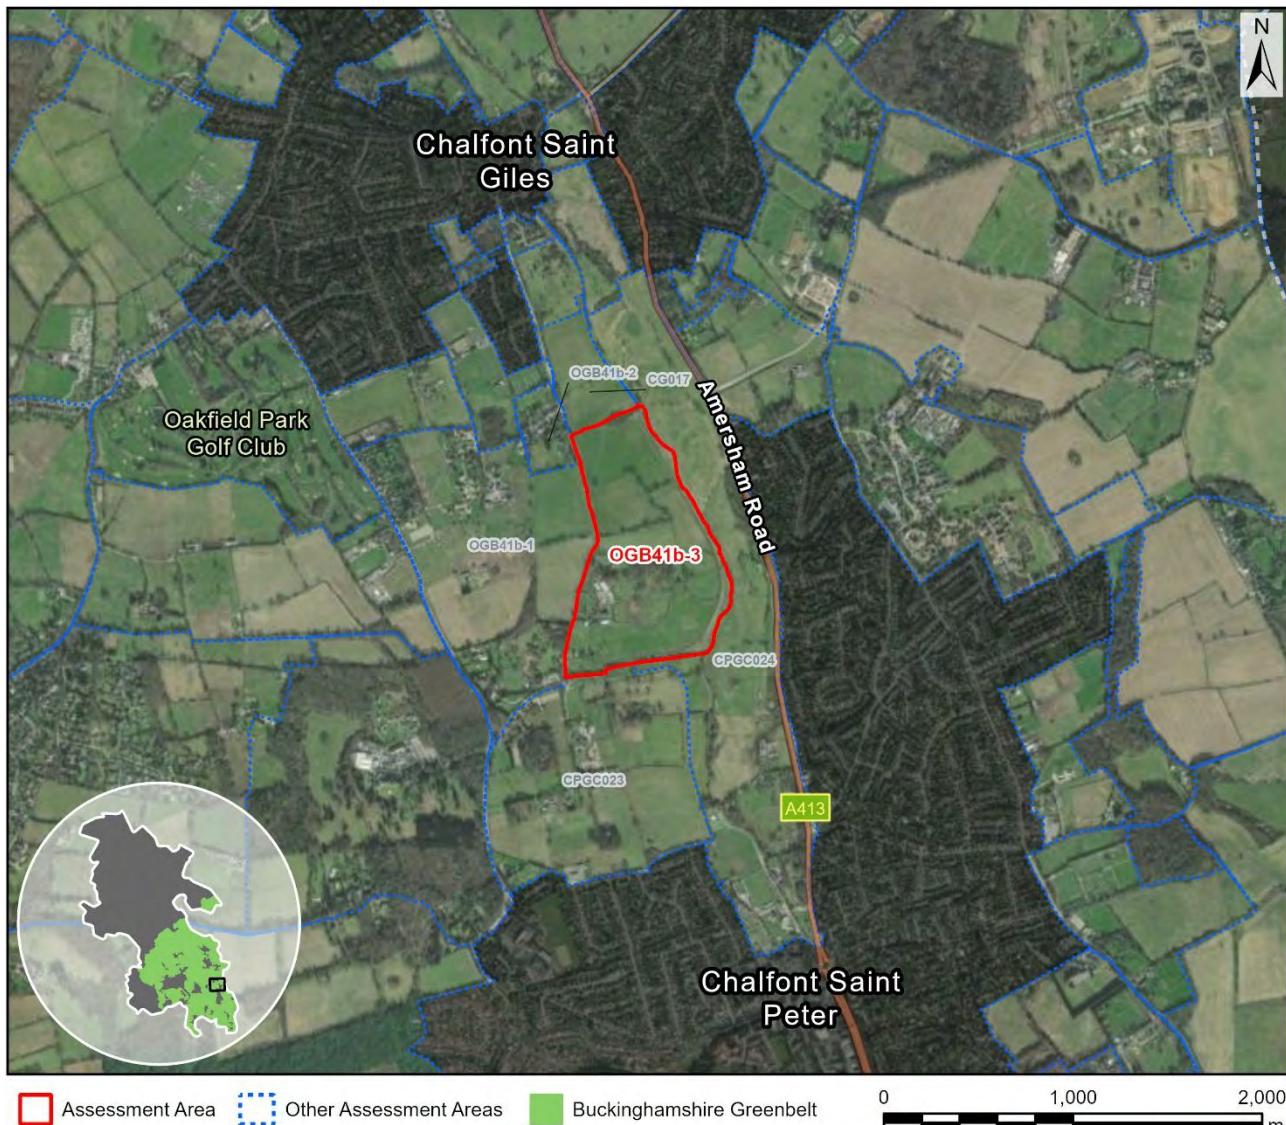

National Landscape (NL) **Unconstrained:** Not within the NL

| | |
|-----------------------|---|
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Unconstrained: No notable constraint |
| Irreplaceable habitat | Unconstrained: No notable constraint |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Unconstrained: No notable constraint |
| NL setting | Unconstrained: 500-1000m from the NL and considered unlikely to fall within the NL setting (not assessed in detail). |
| Conclusion | Grey belt as the AA does not make a strong contribution to any of the relevant Green Belt purposes and is judged unconstrained in terms of NPPF footnote 7. |

Site OGB41b-3

Site Details

| | |
|------------|---------------|
| Reference | OGB41b-3 |
| Settlement | N/a |
| Conclusion | Not grey belt |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Purpose B **Strong:** The AA comprises a substantial part of the gap between Chalfont St. Giles and Chalfont St. Peter and makes a significant contribution to appreciation of the gap. This is an important sector of the Misbourne Valley, with potential for views from the A413 and the South Bucks Way.

Purpose D **None:** No notable contribution

National Landscape (NL) **Unconstrained:** Not within the NL

| | |
|-----------------------|---|
| Flood risk | Unconstrained: No notable constraint |
| Biodiversity | Unconstrained: No notable constraint |
| Irreplaceable habitat | Unconstrained: One veteran tree. |
| Local Green Space | Unconstrained: Not LGS |
| Historic environment | Provisionally constrained: Includes a cluster of four listed buildings (a historic farm) but these are slightly set back from the road and not easily appreciated. This is the side of the Misbourne Valley. |
| NL setting | Unconstrained: 500-1000m from the NL and considered unlikely to fall within the NL setting (not assessed in detail). |
| Conclusion | Not grey belt as the AA makes a strong contribution to one or more of the relevant Green Belt purposes. |

Site OGB42-1

Site Details

| | |
|------------|---------------|
| Reference | OGB42-1 |
| Settlement | N/a |
| Conclusion | Not grey belt |

Map data © Copyright Buckinghamshire Council (2025) Licence No. 0100062456. Imagery source (imager used 2025 (note- image source does not state the date the image was taken): Earthstar Geographics, Esri UK, Esri, TomTom, Garmin, FAO, NOAA, USGS, Esri UK, Esri, TomTom, Garmin, GeoTechnologies, Inc, METI/NASA, USGS.

Assessment

Purpose A **None:** No notable contribution

Purpose B **Strong:** The AA comprises a substantial part of the gap between Beaconsfield and High Wycombe and makes a significant contribution to appreciation of the gap. This is a large AA in the National Landscape with a range of features that could be drawn upon to preserve a substantial gap; however, the northern extent of the AA is associated with a somewhat sensitive gap because of washed over built form (Penn)

Purpose D **None:** No notable contribution

National Landscape
(NL)

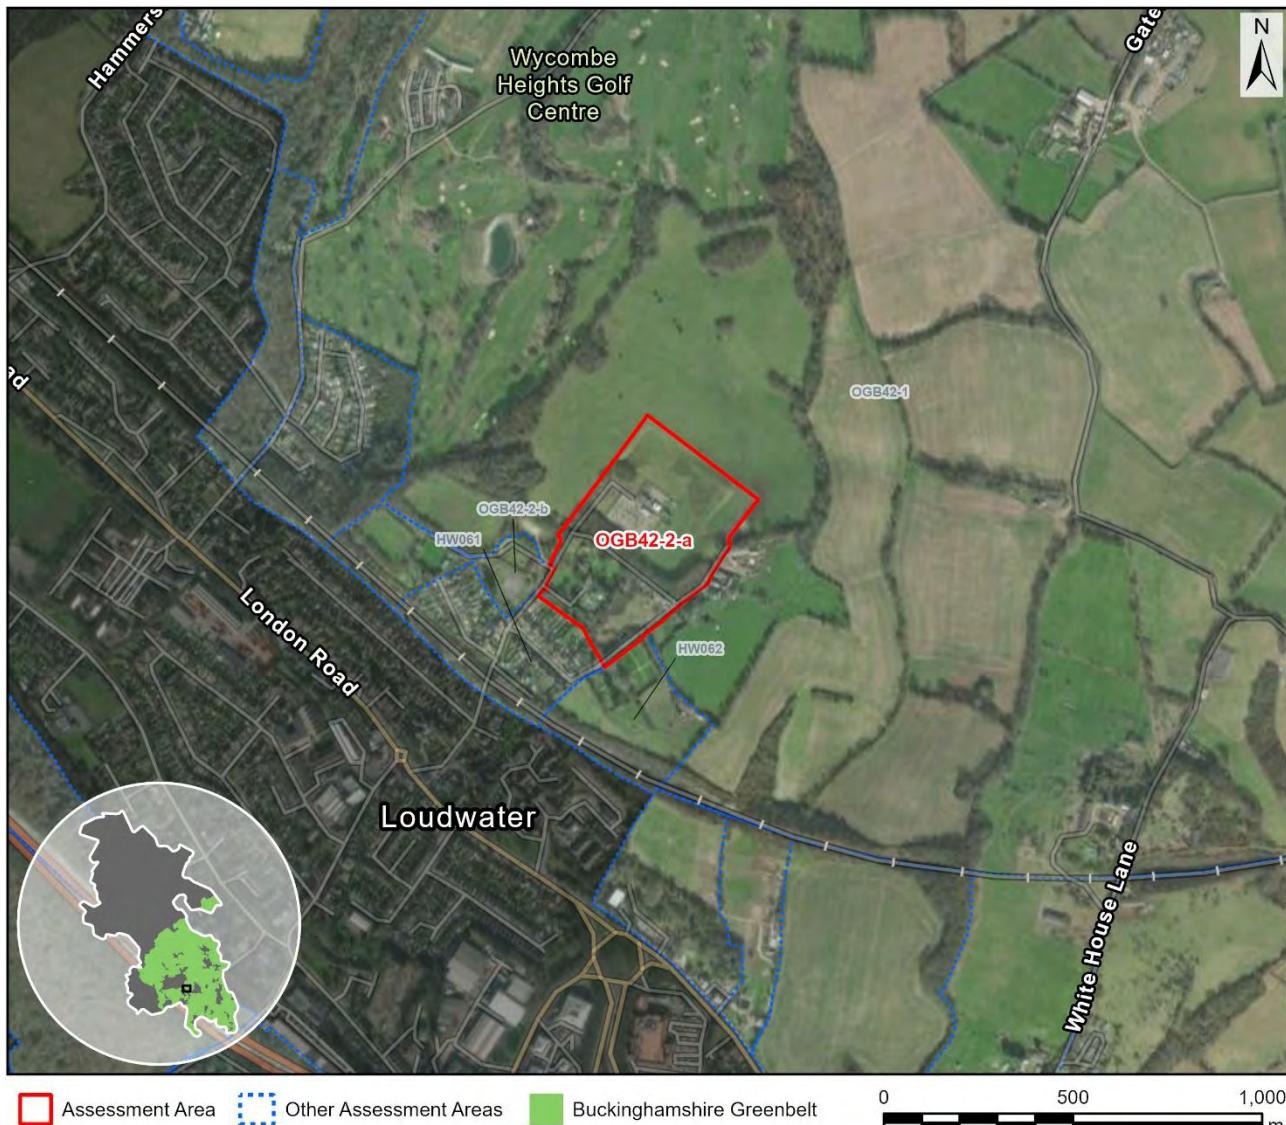

Constrained: Within the NL

| | |
|-----------------------|--|
| Flood risk | N/a: Already ruled out (NL) |
| Biodiversity | N/a: Already ruled out (NL) |
| Irreplaceable habitat | N/a: Already ruled out (NL) |
| Local Green Space | N/a: Already ruled out (NL) |
| Historic environment | N/a: Already ruled out (NL) |
| NL setting | N/a: Already ruled out (NL) |
| Conclusion | Not grey belt as the AA both makes a strong contribution to one or more of the relevant Green Belt purposes and is subject to footnote 7 constraint. |
